

## 824 Application Advice

### Interchange Control Header (ISA):

ISA~00~                    ~00~                    ~ZZ~04000                    ~ZZ~12345                    ~090501~1022~U~00204~000010459~0~P~<  
(General Response)

ISA~00~                    ~00~                    ~ZZ~04000-824                    ~ZZ~12345-824                    ~090429~1631~U~00204~022289691~0~P~<  
(For GXS)

ISA~00~                    ~00~                    ~ZZ~03103                    ~ZZ~12345                    ~090501~1022~U~00204~000010459~0~P~<  
(SSD Batch Response)

### Functional Group Header (GS):

GS~AG~04000~12345~090501~1022~64~X~002040CHRY

GS~AG~03103~12345~090501~1022~64~X~002040CHRY  
(SSD Batch Response)

### Implementation Notes:

- Version in the ISA relates strictly to the version of the ISA and not the version of the transaction.
- Version in the GS identifies the version of the transaction.
- An ASN (856) response will contain both the Functional Group and Transaction for both the 824 Application Advice and 997 Functional Acknowledgment. All other 824 Application Advice Transactions shall be stand alone in the interchange.
