

## **997 Functional Acknowledgment**

### **Interchange Control Header (ISA):**

ISA~00~                    ~00~                    ~ZZ~04000                    ~ZZ~12345                    ~090501~1022~U~00204~000010459~0~P~<

### **Functional Group Header (GS):**

GS~FA~04000~12345~090501~1022~64~X~002040

### **Implementation Notes:**

- Version in the ISA relates strictly to the version of the ISA and not the version of the transaction.
- Version in the GS identifies the version of the transaction.
- An ASN (856) response will contain both the Functional Group and Transaction for both the 824 Application Advice and 997 Functional Acknowledgment. All other 997 Functional Acknowledgment Transactions shall be stand alone in the interchange.
